BEYOND PORT TO PORT

DHL GLOBAL FORWARDING

BEYOND PORT TO PORT

DHL Global Forwarding's worldwide network enables door-to-door movement, visibility and control of all international ocean freight. With over 330 ocean freight of□ces, each with a dedicated freight team. You can be assured that your needs in both quality and coverage are served.

We will identify your optimum logistics solution in terms of best time-to-cost variation. Based on your speci□c requirements, DHL can consolidate your LCL (Less than Container Load) shipments or arrange for your FCL (Full Container Load) needs. Our long term relationships with carriers allows us to offer you delivery □exibility and a competitive price.

DHL Global Forwarding is not only the leading Ocean Freight forwarder but through Danmar Lines, our own NVOCC (Non Vessel Operating Common Carrier) we can act as your virtual carrier for both LCL and FCL. As the carrier we are able to issue our own Bills of Lading giving us greater control in the cost and movement of your cargo.

DHL's tracking & tracing system provides full transparency along the entire supply chain. Our Information Management Systems provide complete visibility and can easily take care of updating your in-house IT systems, as well notifying Customs authorities and your contractors of all shipment details.

With the help of the INTTRA portal, which links DHL to the carriers' systems, we are able to offer faster document processing whilst increasing shipment visibility during transit.

DHL Global Forwarding's worldwide team uses the latest freight forwarding shipping tools, which you can rely on to manage your shipments' speci□c needs. Our personal commitment to deliver proactive worldwide solutions is the foundation on which DHL Global Forwarding is built upon.

FIRST CLASS CONNECTIONS

FULL CONTAINER LOAD (FCL)

- As one of the largest ocean freight providers for FCL our global annual volumes are close to 2,400,000 TEUs (Twenty Foot Equivalent Unit).
- Our specialized and dedicated purchase management team negotiates our global volumes with □rst-class carriers to ensure quality, space allotment and optimal pricing.
- Through our web enabled IT solutions, we are able to provide visibility and transparency of your shipments, giving you peace of mind that your shipments are in safe hands.
- To guarantee the best possible procurement with the carriers, our team of specialist negotiators will leverage DHL's global volume potential to secure you the most competitive freight rates. Purchasing through our Carrier Procurement Program ensures that you are not burdened with excessive ocean freight costs or insuf□cient contracts.

DELIVERING THE WORLD

LESS THAN CONTAINER LOAD (LCL)

- At DHL Global Forwarding we recognize the importance of LCL, which is why we invest heavily into the systems development. Our global annual LCL volumes are close to 2,000,000 cbms.
- We offer a comprehensive global network for both traditional LCL as well as LCL/FCL or 'Buyers consolidations' from both single and multiple countries.
- DHL Global Forwarding's in house systems control cargo □ow, shipment information, speed, accuracy and cost ef□ciency giving you greater assurance that we are managing your full shipment requirements.
- Our □rst priority is to serve all major markets with direct consolidations from our strong network of National Gateways. Multinational Gateways act as backup for direct consolidations by running in-house feeder systems in most major markets.
- DHL Global Forwarding carries over 97% of its total LCL volumes in house. Co-loading out with third party NVOCCs is always the last option.
- By working with reputable carriers, we offer a fast, cost ef□cient and reliable LCL service, which aims to build on your company's competitiveness.
- All LCL services are accompanied by a suite of web-enabled IT solutions including shipment tracking and order monitoring.

INTEGRATING GLOBAL SOLUTIONS

OCEAN LOGISTICS

Through a global network of more than 60 Control Towers, DHL Ocean Logistics' professionals design, implement, and manage supply chain services on behalf of our Customers.

We focus on improving the integration and visibility of your supply chain from origin to destination. As our service will be measured against your de□ned requirements, performance assessment is easily achieved.

Ocean Logistics brings together DHL's full supply chain capabilities to create unique customer solutions.
